Summary

Software engineer graduating in June 2026 with production experience across CI/CD automation, cloud infrastructure (AWS, Google Cloud, Kubernetes), and object-oriented development. Founded and led engineering at an AI-workflow startup, owning architecture decisions from concept through delivery. Focused on writing well-tested, maintainable code and collaborating closely with cross-functional teams. Based in Mexico City.

Technologies

Programming Languages: Python (5 yrs), Java (4 yrs), JavaScript (3 yrs), C++ (4 yrs), Rust (1 yr)

Infrastructure & Tools: AWS, Google Cloud, Docker, Kubernetes, Jenkins, GitHub Actions, Linux, Bash

Data & Testing: PostgreSQL, OOP, Playwright, Selenium, WebDriver IO, DataDog

Languages: Spanish (Native), English (B2), German (A2)

Work Experience

Software Quality Engineer Tools (promoted from DevOps Engineering Intern) Sept 2023 – Present
Teradata

- Migrated CI/CD pipelines from GitLab to GitHub Actions, improving build automation across multiple projects
- Built automated AI-driven testing workflows with agents and MCPs, cutting UI test creation time
- Developed 500+ automated tests across three projects, using object-oriented test-framework design (Playwright, Selenium, WebDriver IO)
- Designed and shipped a CI/CD pipeline for a desktop app using Jenkins, Docker, Kubernetes, and WebDriver IO
- Operated across cloud platforms (AWS, Google Cloud) with production monitoring via DataDog

CTO & Co-Founder May 2025 – Present
Renaissance

- Owned technical architecture and roadmap for an AI-agent workflow studio, leading projects from concept through delivery
- Designed and shipped production AI agent workflows (OpenAI, Claude, DeepSeek) for business-process automation across five client engagements
- Sold and delivered end-to-end automation systems, including a CRM-integrated customer service bot

Web Developer Aug 2023 - Sep 2023
One Connection

- Built and deployed a cloud-based HR web application on AWS with a relational database backend
- Developed prediction models to recommend optimal communication channels and collection days

Software Projects

Impulsa tu Futuro (Power your future) 2025
Full-stack platform [GitHub Repo](#) [🔗](#)

- Full-stack web platform to share and track applications for internships, scholarships, and hackathons, with personalized recommendations, user profiles, notifications, and collaborative tools.

Tools: Django, React, PostgreSQL

Education

Bachelor's Degree in Computer Science Aug 2021 – Jun 2026
Universidad Nacional Autónoma de México (UNAM)

- GPA: 94/100 — **Fields of Interest:** Theoretical Computing, AI, Parallel Computing

Leadership & Recognition

ICPC World Finals [🔗](#) 2024
Honorable Mention, top 2% of 50,000+ participants worldwide Luxor, Egypt

Founder, Doors — Student Group Aug 2023 – Present

- Organized three conferences for 100+ students on open source, internships, and CS collaboration
